ENCORE
Model 3600/4800
Premium Insulated Steel
Garage Doors

The Lynx 4800 (Short raised panel) 3600 (longer raised panel), WGR (woodgrain flush), ST-101 (woodgrain ribbed). Encore garage door series offers quality hot dipped galvanized steel combined with a multi-layered rust protective coating and is finished with durable exterior polyester top coat. A unique high pressure heat process insures the EPS insulation core is bonded to both steel surfaces eliminating any air pockets or "potholes" typical with many foam injected products. Each panel is insulated with a 1 3/4" expanded polystyrene core that will provide a stable long term R-value (8.9) over the life of the product. The assembly has a high quality finish with superior oven dried Canadian Pine section connectors that make an effective thermal barrier between sections. Finally, because its insulating component contains no CFC's, the Encore line is environmentally friendly and comes with a solid full coverage warranty.
