Premium Insulated Steel Garage Doors

ENCORE....Quality, Value, Beauty and Security

When it comes time to select your garage door choose a product that has been the top choice for professional builders and homeowners in Canada for over 30 years.

The ENCORE 3600 and 4800 series garage doors will compliment any traditional style or custom designed home with a variety of colors, windows, and patterns.

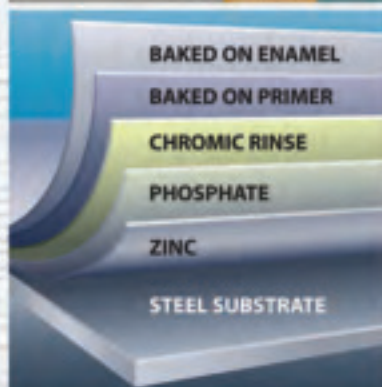

LYNX
INDUSTRIES
DOORS • HARDWARE • OPENERS

For over 30 years we have been manufacturing quality door products in Canada

The ENCORE 3600/4800 is simply the best door we have ever produced. Backed by a 15 year limited warranty it is designed to exceed all expectations in a garage door design.

ENCORE doors require virtually no maintenance. A little bit of soap and water twice a year is all you need to protect your investment.

Roll-formed tongue and groove section joints create a strong and solid door structure.

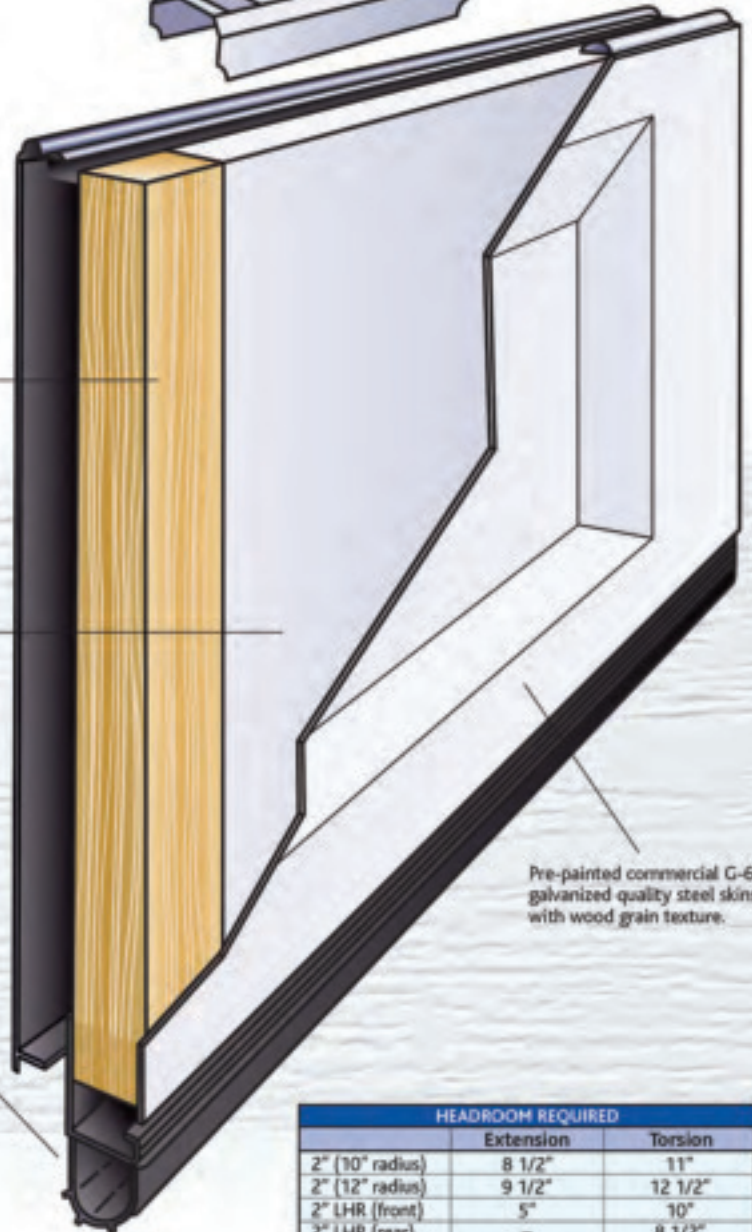

FINISH: Exterior and interior door skins receive a five (5) coat steel protection.

2 3/4" wood end stiles create a thermal break and support for the end hinges.

Solid core polystyrene foam insulation (1.2 pounds per sq. ft.) R-8.9

PVC bottom retainer and weather strip provides all-weather protection at bottom of door.

16 gauge steel backup plates for hardware, center hinges and strut reinforcement.

Pre-painted commercial G-60 galvanized quality steel skins with wood grain texture.

	HEADROOM REQUIRED	
	Extension	Torsion
2" (10" radius)	8 1/2"	11"
2" (12" radius)	9 1/2"	12 1/2"
2" LHR (front)	5"	10"
2" LHR (rear)	-	8 1/2"

HARDWARE: LYNX INDUSTRIES manufactures its own hardware components, insuring you receive quality products that are made especially for the door you are purchasing.

WOODGRAIN RIBBED TEXTURE

MADE OF STEEL FOR SUPERIOR STRENGTH

Every ENCORE door is manufactured using quality hot dipped galvanized steel combined with a multi-layered rust protection and finished with a durable exterior polyester topcoat.

A unique high pressure heat process insures the EPS insulation core is bonded to both steel surfaces eliminating any air pockets or "potholes" typical with many foam injected products. Each panel is insulated with a 1 3/4" expanded polystyrene core that will provide a stable long term R-Value (8.9) over the life of the product. In its final assembly we use a 2 3/4" solid wood block at each end as support for the end hinges.

Solid wood end stiles also act as an efficient thermal break between interior/exterior steel skins.

ENCORE doors will add curb appeal to your home and

are guaranteed to work as good as they look.

Deep, rich wood-grain finish provides a perfect combination of strength and durability.

MODEL 3600
RAISED PANEL - 16 FT. WIDE
